B-Tech release pop-out mounts for smaller screens

Award-winning manufacturer B-Tech AV Mounts has launched two new flat-screen wall mounts, purposely designed to allow recessed and videowall installs of small and medium sized displays.

Featuring B-Tech's solid and reliable pop-out technology, the BT8308 and BT8309 mounts cater for screens up to 42-inches and 25kg, with VESA fittings from 75x75 up to 200x200.

The first range of its kind to cater to smaller displays, both mounts allow screens to be fitted in either landscape or portrait orientation and are compatible with B-Tech's professional pole and collar system - providing a wealth of mounting versatility.

Other user-friendly features such as keyhole mounting, levelling screws and cable management can be found on both solutions, with the added benefit of full micro-adjustment on the BT8309. These tool-less adjustment knobs allow screens to be perfectly aligned to the wall recess, or to other screens if used in a videowall installation.

Mark Walker, business development manager for B-Tech, said: "These new mounts have been designed and manufactured as a direct response to market demand. We have enjoyed enormous global success with our BT8310 video wall mount and it was clear that a similar product, catering for smaller screens, would be welcomed by installers.

He adds: "These new mounts have all the precision expected from B-Tech, with a solid pop-out mechanism that allows for easy access to the rear of the screens for easy installation and servicing. They say the best things come in small packages, and these latest additions to our range are ideal for recessed single screen applications and small videowalls."

Both the BT8308 and BT8309 are available now from stock, with all mounting hardware included. Contact your B-Tech representative for more information.
